My name is Jacob Moya, a California-based web developer passionate about crafting innovative solutions and creating user-centric, mobile-responsive, SEO-optimized, and accessible websites. Specializing in front-end development, I leverage modern web technologies and site-building tools to deliver high-performance websites with clean, scalable code that enhance user experience and drive engagement. I thrive on combining creativity, abstract thinking, and research to develop unique, impactful web solutions.

Experience

10/2022 — present
Arizona, Remote

BIZIQ - Web Developer II

As Web Developer II, I've excelled in creating SEO-driven & accessible websites. All while enhancing UI/UX for high conversions, and growing my skills for team success.

- Installed, optimized, and developed 150+ websites across a wide range of industries.
- Ensured prompt, effective, and accurate completion of client updates.
- Installed and configured over 150 diverse plugins to meet project needs.
- Successfully completed 3000+ web-related tasks, ensuring timely delivery.
- Applied responsive design techniques using CSS Grid, Flexbox, and media queries for optimal performance across devices.
- Developed responsive, mobile-friendly websites to enhance user experience.
- Integrated third-party libraries and frameworks, including Bootstrap and jQuery, to extend website functionality.
- Modified and customized existing plugins to meet client specifications and improve performance.
- Managed email infrastructure and optimization via Rackspace.

BIZIQ - Web Developer I

While working remotely, I developed 100+ websites, earning accolades for quality, clear communication, and client-focused execution.

- Integrated WordPress with external services to enhance functionality.
- Configured contact forms and email systems using both plugins and custom solutions.
- Deployed WordPress sites to production environments through FTP.
- Utilized page builders like Elementor, WPBakery, and Gutenberg for site design and customization.
- Worked with various CMS platforms such as WIX, Shopify, and Squarespace for diverse project needs.
- Ensured all websites were optimized for speed, performance, and accessibility.

10/2020 — 10/2021
Corona, CA

### VAREP - Junior Web Developer

Led the transition from Joomla to WordPress, collaborating with designers to deliver a visually striking, functional website with seamless execution.

- Optimized all owned domains for mobile responsiveness and page speed.
- Completely overhauled the website, transitioning from an outdated CMS.
- Utilized BeaverBuilder to design and implement site features.
- Converted wireframes into fully functional web pages.

Experience

- Developed custom forms with GravityForms to enhance user interaction.
- Managed and maintained the dynamic media library via FTP.
- Optimized and maintained legacy sub-domains for improved performance.
